

FREEMAN MARINE Quick-Acting doors feature patented chain-drive, single actuation dogging. This design feature allows for the installation of full length, centrally located windows as well as Quick-Acting doors with unique shapes, camber, knuckles and sloping surfaces. Heavy Duty panels feature thick panel skins, extra internal reinforcements, no exposed seams and all welded construction. Standard commercial and machinery space doors often feature FREEMAN'S trademark lineal brushed finish that creates a durable, uniform texture. When specified with optional painted finish to your color specifications, welded construction results in a long lasting, smooth, seamless exterior. Doors offer welded-in windows and can accommodate special glazing. Quick-Acting Duty doors are suitable for the following typical high traffic access installations:

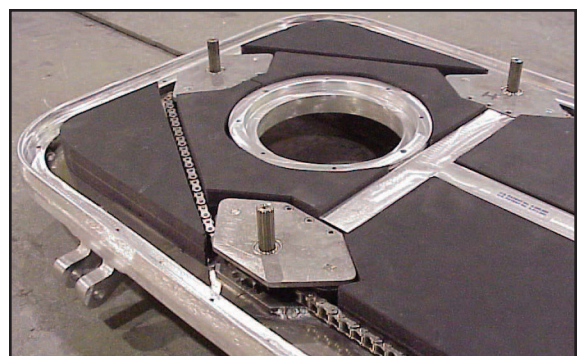

- Pilothouse • Galley • Engine Room • Salon
- Main Deck • Staterooms

Four styles of Quick-Acting doors.

**QUICK-ACTING, HEAVY DUTY DESIGN FEATURES**
