

FREEMAN has the capabilities to convert your project design into reality. Building, testing and delivering specialty projects requires the right tools... the right know how... and years of experience. FREEMAN has this experience, the facilities and staff capabilities to make your project an on-time success.

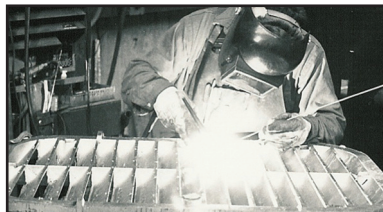

Freeman has the expertise to cast challenging shapes and features in large flat castings. Large castings such as access hatches (shown left and below) can be done to your exact specifications.

Watertight cast aluminum access hatch cover on galvanized steel coaming for floating pontoons.

Large castings like this access hatch can be done to your exact specifications.

Craftsman combine castings and fabricated louvers to create hinged ventilation access cover.

Inspection ports for floating pontoons, aluminum covers and galvanized steel coamings.

Small inspections ports.

IN-HOUSE FOUNDRY AND PATTERN MAKING

Foundry; Pouring flasks.

Large thin castings are a specialty for FREEMAN.

In-house pattern making and match plates are a FREEMAN specialty.

Large panels, special shapes, intricate detail are all possible in large castings.
